- If you live in Hawaii or Alaska, the guidelines are different. You can look up the levels for those residents here.
- If you have more than 8 people in your household, add the amount in the last row to the 8 person household for each additional person. For example, if you have 10 people, add \$52,720 + \$5,380 + \$5,380 to see the amount for 100% of the federal poverty level.

Here are some examples of how to read this chart:

- A single person who makes \$12,000 a year in total income before taxes would be below 100% FPL.
- A single person who makes \$45,000 would be below 400% FPL but above 300% FPL.
- A family of 4 who makes \$55,000 would be below 200% FPL but above 150% FPL.
